Part of the Fysicon family:

FysiconEVOCS®

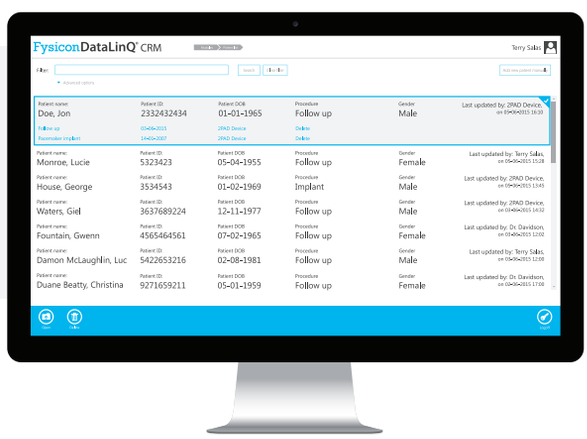
FysiconQMAPP®

FysiconDataLinQ®

DataLinQ provides the solution for bringing structure into your pacemaker, ICD, loop recorder and remote device administration. The great diversity of data originating from the different pacemaker programmers and remote device systems is integrated into a powerful and well-organised database. Using the DataLinQ 2PAD, data can be exported from all pacemaker programmers. DataLinQ CRM (Cardiac Rhythm Management) is a complete data, management and reporting system for registration and (remote) monitoring.

Full Workflow Integration

Plug & Play connection.
No switch - No USB stick.



PM/ICD/ICM Management

Improved automated export and import of PM/ICD/ICM data.
Display of more than 500 parameters.

Electronic Medical Record (EMR) Integration

Exchange of data between DataLinQ and your existing EMR (based on standard protocols).

Remote Device Management

Easy import of remote device data in DataLinQ.

National Registry

Convenient data transfer to your national registry.

Patient Planning Module

Scheduling patients in a clear overview.
